Compact footprint

Just 23.4 mm (9.21 inches) wide

Power supply (9 ... 48 V)

- Pluggable connector
- Maintenance-free, vibration-proof spring pressure connections

5 ETHERNET ports

- Autonegotiation 10/100/1000
- Auto MDI/MDI-X: Auto-Crossing
- Status LEDs: PWR/Activity

Robust design

- DIN-rail adapter and metal housing
- Excellent vibration and shock resistance
- Surrounding air temperature (operation): -40 ... +70°C

Industrial Unmanaged Switches

Eco – Economical and Compact

	Fast Ethernet		Gigabit	
				
Ports	5 x 10/100BASE-TX	8 x 10/100BASE-TX	5 x 10/100/1000BASE-T	8 x 10/100/1000BASE-T

¹ With DIN-rail adapter, Item No. 852-9101

Power supply (24 ... 57 V)

- Pluggable connector
- Vibration-proof, maintenance-free power supply connection (24 V)

Status LEDs

- Power supply is connected.
- PoE sensor is powered.
- Communication partner is connected.
- Data is being transmitted.

4 ports with PoE+ (30 W)

5 ETHERNET ports with up to 1 Gbit/s

Use of SFP modules* with 1 Gbit/s

Surrounding air temperature (operation): -40 ... +70 °C

* Small Form-factor Pluggable Interface for fiber optic cables

Eco with PoE – Power Supply via ETHERNET Cable

“Power over Ethernet” (PoE+) technology supplies PoE-capable devices via network cable using a switch. This allows, for example, PoE-capable IP cameras, IoT sensors or HMI systems to be economically integrated into the network – no need for separately installing power and data cables. Other advantages include diagnostics performed within the system.

Type	PoE+		
			
PoE+ ports	4 x PoE+ (30 W)	4 x PoE+ (30 W)	4 x PoE+ (30 W)
Copper ports	5 x 10/100/1000BASE-T	5 x 10/100/1000BASE-T	5 x 10/100/1000BASE-T

³ No PROFINET configuration and diagnostics with conformity class A

Redundant power supply

Status LEDs

- Primary power supply available
- Secondary power supply available
- Alarm message is displayed

RS-232 interface for command-based configuration

Integrated Web-Based Management for configuration or diagnostics

Use of SFP modules* with 1 Gbit/s

Alarm contact

- Jet ring diagnostics
- ERPS ring diagnostics
- Monitors the primary and secondary power supply
- Monitors ETHERNET ports
- Signals via PLC or remote I/O (e.g., indicator light on the front of the control cabinet)

USB interface

- Firmware update
- Saving the diagnostics (Syslog)
- Loading/saving the configuration

Configurable functions

- Safety
- Availability (redundancy and diagnostics)
- Performance
- Data transmission

* *Small Form-factor Pluggable* Interface for fiber optic cables

Industrial Managed Switches

Powerful and Secure

* Suitable SFP modules on page 16

² For supply voltage < 48 VDC, the PoE budget is limited to 120 watts.

¹ Configurable via DIP switches (1000BASE-SX/LX or 100BASE-FX)

PROFINET-Specific Features

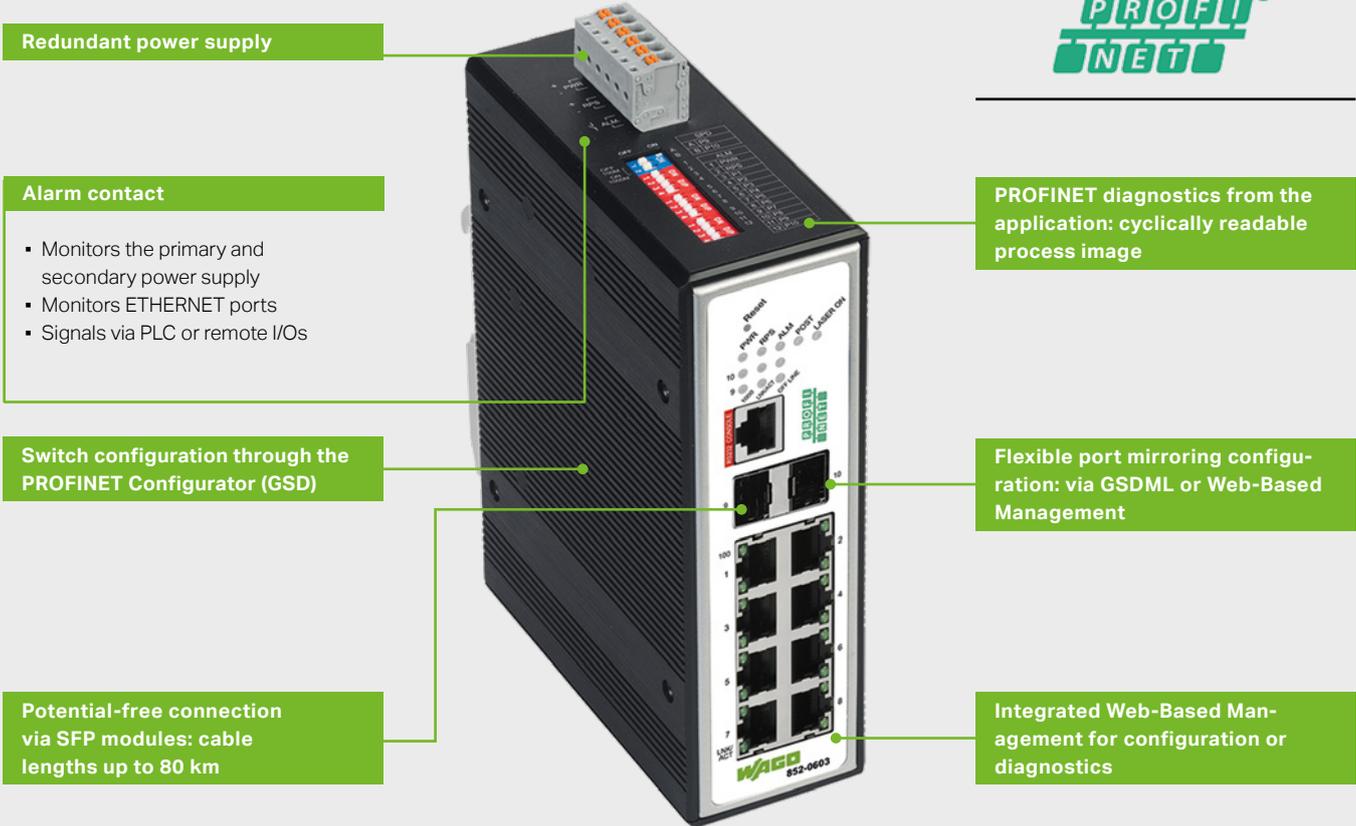

The following products meet the requirements of PROFINET conformity class A (CC-A):
 852-1111, 852-1112, 852-1411,
 852-1411/000-001 and 852-1417

Special Product Features:

- Prioritized PROFINET data packet forwarding
- Configuration via GSDML file not possible
- Neighborhood detection and PROFINET diagnostics not possible

Your Benefits:

- Use in industrial automation thanks to PROFINET certificate (conformity class B)
- Port-independent configuration of the media redundancy protocol as a manager (MRM) or client (MRC)
- Flexible multi-port mirroring configuration via device description file
- Switch configuration with device description file

* Small Form-factor Pluggable Interface for fiber optic cables

Industrial Managed Switches

PROFINET – Use in Industrial Automation

Function Overview of the Industrial Managed Switch

- Storm Control
- Bandwidth Control
- Auto-Provisioning
- Link Aggregation
- ...

- ERPS
- Dual Homing
- Xpress/Jet Ring
- Dual Ring
- STP/RSTP
- MRM/MRC *¹
- ...

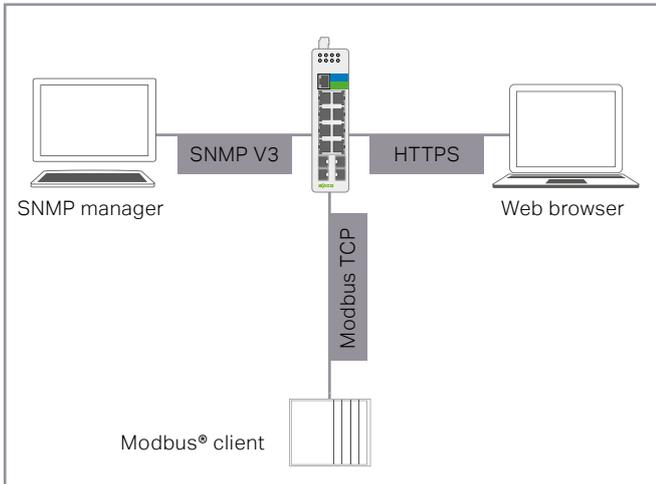

- VLAN
- IGMP Snooping
- IP-based VLAN
- MAC-based VLAN
- ...

- IEEE 802.1X Authentication
- Access Control List
- DHCP Snooping
- Port Security
- Service Control
- ...

Administration and Diagnostics

Simplified Commissioning and Maintenance

Configuration Interfaces

Configuration and Diagnostics

Several Options

- Configuration via Web-Based Management
- Configuration via command line (SSH, Telnet, RS-232)
- Network management via SNMP v1, v2c, v3
- Support for MIB standards (*Management Information Base*)
- Diagnostics via Modbus TCP
Comprehensive data available for easy diagnostics via Modbus®

DDM

DDM: Digital Diagnostic Monitoring

- Automatic detection of a connected SFP module
- Detailed module information
- Monitoring in real time
 - Temperature
 - Supply voltage
 - Transmission power
 - Reception power

Port Mirroring

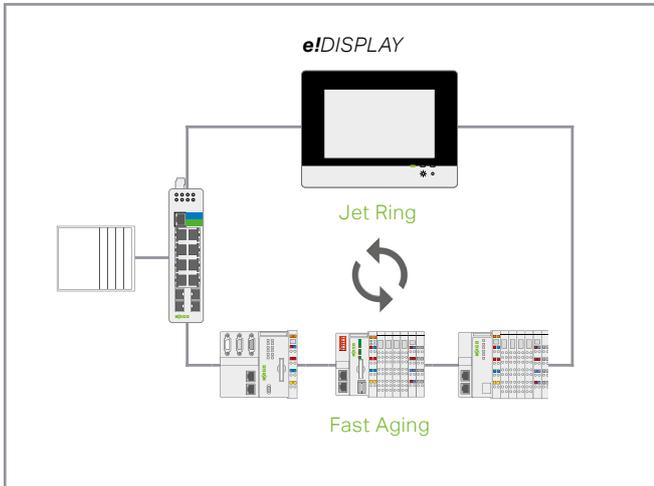

Monitoring and Diagnostics

Simplified Maintenance

- Port mirroring:
Mirrors the network traffic
- LLDP:
Automatically detects adjacent devices
- Email notifications

Availability

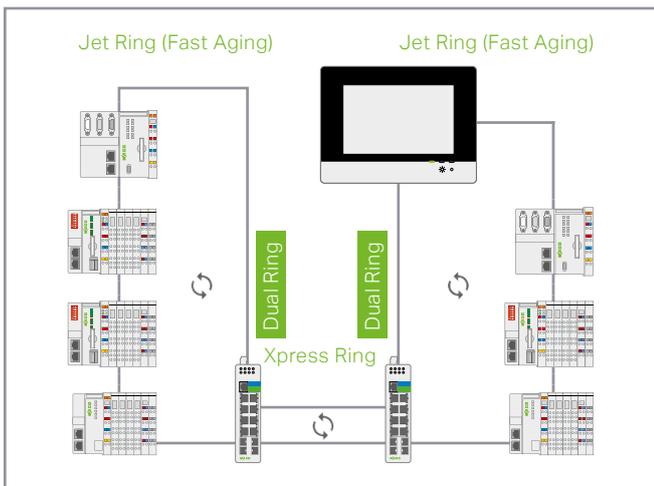

via Communication Redundancy

Jet Ring

Jet Ring

- Typical switching time of 400 ms (depends on the application)
- Extremely easy configuration (on or off)
- Up to 20 switches in a Jet Ring
- WAGO ETHERNET devices (Fast Aging) can be used in the Jet Ring

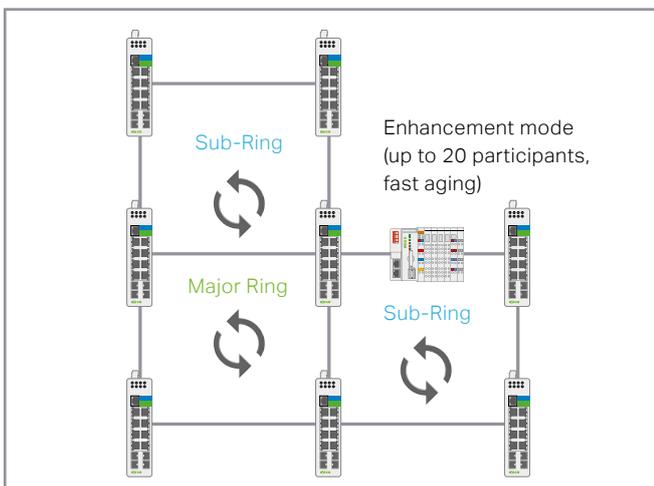

Xpress Ring and Dual Ring

Xpress Ring

- Switching time < 20 ms
- Easy configuration (three parameters per switch)
- Up to 200 switches in one Xpress Ring
- Two Xpress Rings per switch

Dual Ring

- Combination of both redundancy types
- 1 Jet Ring and 1 Xpress Ring per switch or 2 Xpress Rings per switch

ERPS V2

ERPS: ETHERNET Ring Protection Switching The Fast and Open Solution

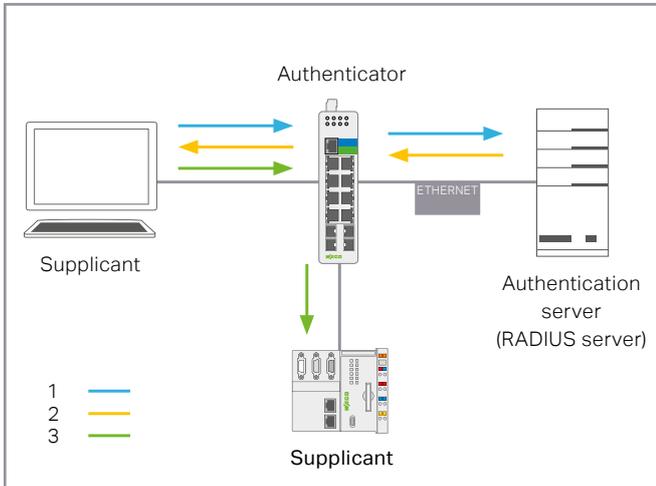

- Standardized and open technology
- Switching time < 50 ms
- Nested topologies with up to six rings per switch
- Realization of one-fault tolerance (SPOF – Single Point of Failure)

ERPS – Enhancement Mode

- WAGO devices with an integrated switch and Fast Aging configuration
- Typical switching time of 400 ms (depends on the application)

Safety

Absolutely Secure Industrial Networks

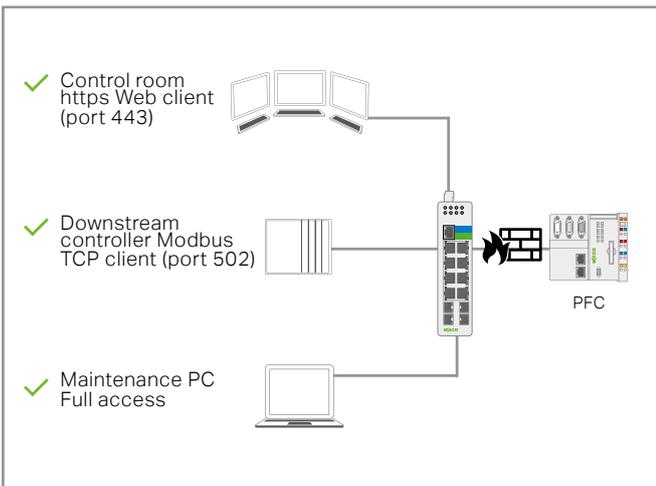

IEEE 802.1X

IEEE 802.1X Authentication The Security Standard for IT Networks

Secure authentication and authorization in ETHERNET networks (locally on the switch or via RADIUS server)

Process:

- Authentication of a subscriber is performed by the authenticator.
- The authenticator checks the authentication information of the subscriber (supplicant) with an authentication server.

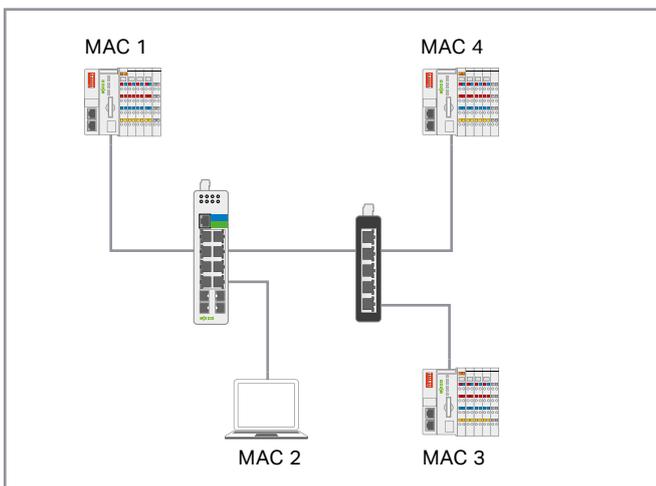

Firewall

Firewall – Access Control List Authorization Only for the Required Services

Filtering data packets via:

- Source MAC or source IP address
- Destination MAC or destination IP address
- Range of MAC or IP addresses
- UDP/TCP source or destination ports

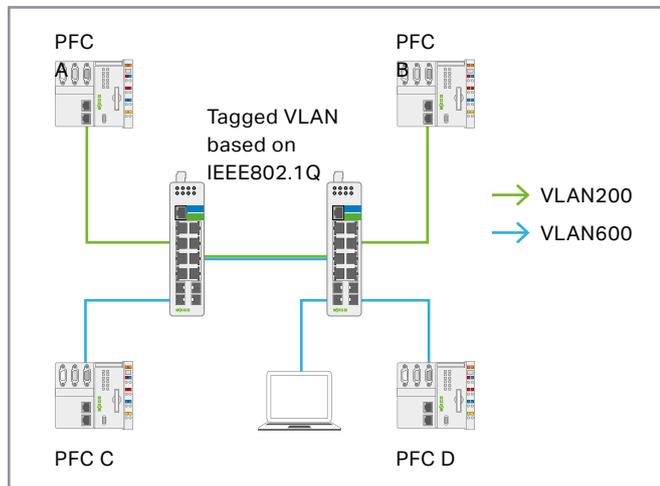

Ports

Port Security

- Dynamically learns MAC addresses for each port
- Limitation of MAC addresses for each port
- MAC-based white/blacklist for each port

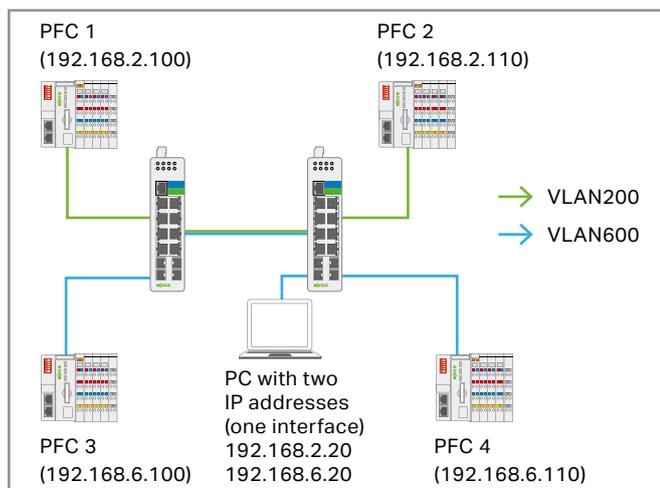

Data Transmission

Optimized ETHERNET Networks

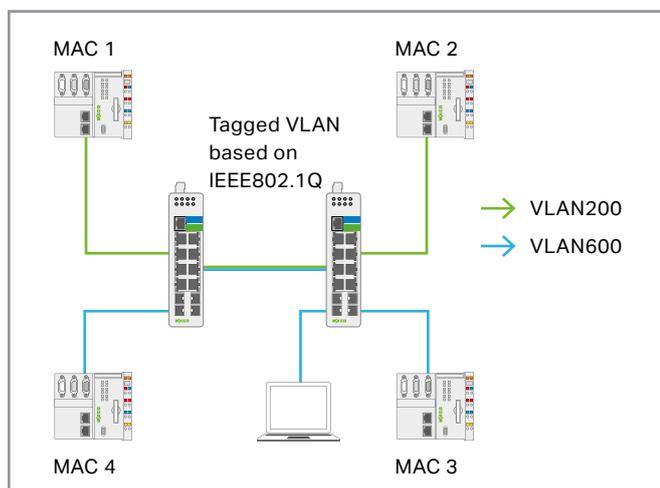

Logical Network Isolation

- VLAN (e.g., per IEEE 802.1Q)
Segmentation into logical, virtual networks:
 - Broadcast limitation
 - Security improvement
 - Data flow prioritization
 - Subdivision of machines and office networks

IP-Based VLAN

- Routing of data packets between VLANs based on the IP address
- Communication from one participant in two or more VLANs
- Economical connection of networks to higher-level routers
- Prioritization of data packets based on the IP address

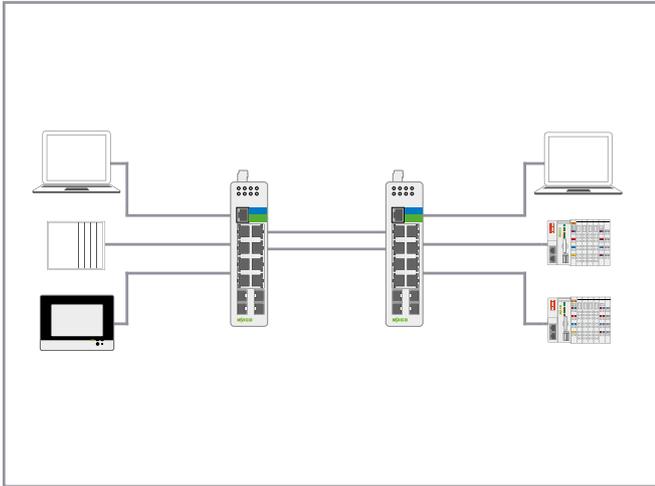

MAC-Based VLAN

- Assignment of data packets to a VLAN based on the MAC address
- Prioritization of data packets based on the MAC address

Performance

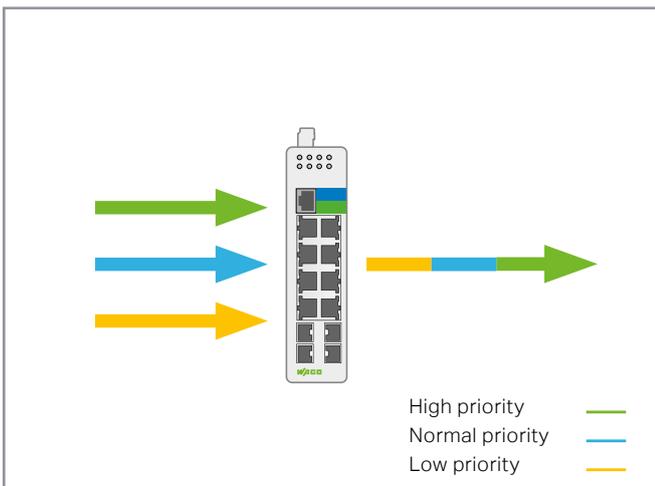

Optimized ETHERNET Networks

Link Aggregation

Network Optimization

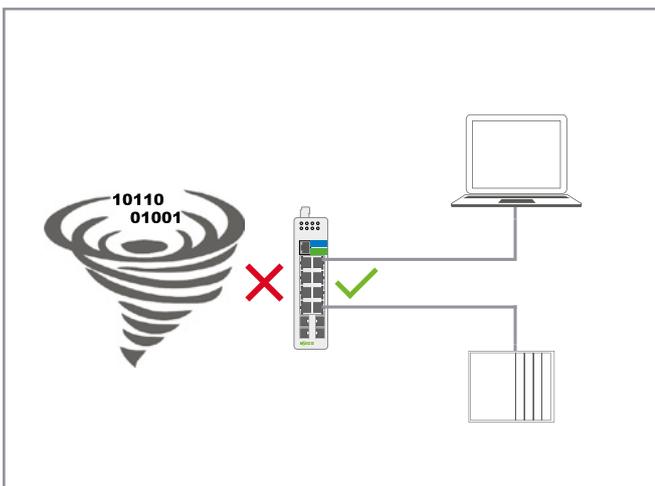

- LACP link aggregation
Merge multiple data connections into a single logical link:
 - Increased transmission rate
 - Link redundancy

QoS

Traffic Prioritization and Limitation

- Faster transfer of important data packets through the switch
- Prioritization of data packets per IEEE 802.1 Q
- Limitation of the bandwidth or number of packets per unit of time per port
- Increase in data transmission quality

Storm Control

Mastering Data Traffic

- Stopping broadcast storms
- Ensuring network availability
- Limiting broadcast and multicast data flows (packets/time)

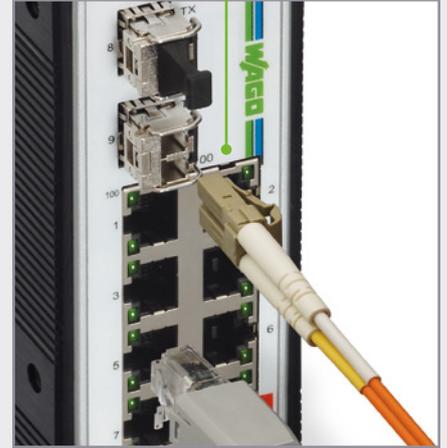

Insertion during operation

Mechanical locking

Adapts to the fiber type

SFP Modules

WAGO Power Supply Pro 2

- Up to 96% efficiency
- Fit for digitalization thanks to communication module
- Versatile configuration options
- Fast and reliable tripping of miniature circuit breakers thanks to temporary output currents up to 600%
- Quick charging of capacitors and fast switching of contactors thanks to output currents up to 150% for five seconds
- Extended temperature range: -40 ... +70 °C

WAGO Power Supply Compact

- Compact, low-profile design
- Ideal for decentralized applications
- Surrounding air temperature (operation): -25 ... +60 °C

WAGO Power Supply Eco

- Budget-friendly for basic applications
- Flexible mounting of DIN-rail adapter
- Flexible installation via screw-mount clips

WAGO Power Supply Classic

- Integrated TopBoost (787-16xx with ≥ 120 W)
- DC OK signal/contact
- Up to 93% efficiency
- Surrounding air temperature (operation): -25 ... +70 °C

■ ■ Recommendation

■ Useable – Limited usability or none at all

WLAN 802.11 a/b/g/d/e/i/h and Bluetooth® 4.0

- Robust communication with high data throughput

Access point functionality

- Build a network of up to 7 clients

Robust design

- IP65 protection type
- Temperature (operation): -30 ... +65 °C
- Direct mounting outside the housing

Version with external antenna

- Antenna gain of 3 dBi (max.)

A single solution for everything

- Wi-Fi and Bluetooth® in one device
- Client or access point
- Range: up to 400 m (open air)

Button

- Easy configuration
- Advanced configuration via Web server or Telnet

Diagnostic LEDs

- Supply voltage
- Network connections
- Wireless signal quality

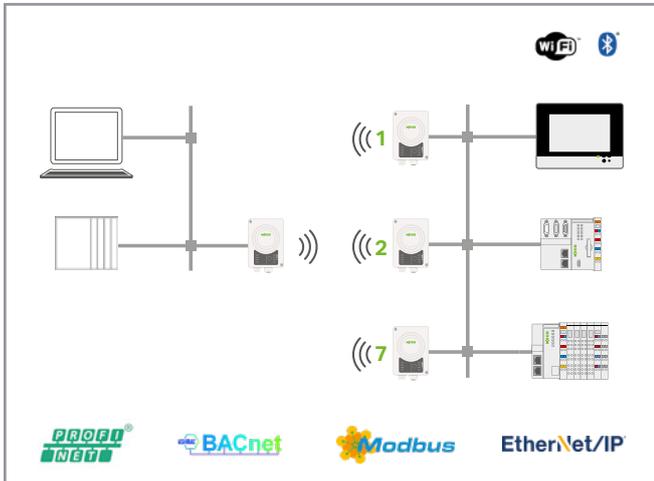

Wireless Ethernet Gateway

Wireless ETHERNET Gateway

		
Antenna	Internal antenna	External ²
Security encryption	WEP64, WEP128, TKIP, AES/CCMP	
Range	400 m	
Frequency band	ISM band, 2.4 GHz (Bluetooth®, WLAN); ISM band, 5 GHz (WLAN)	
Security authentication	WPA/WPA2 PSK, LEAP, PEAP
